### SUMMARY

Experienced Software Developer with 5 years of experience in React, Next.js, Redux, and TypeScript. Skilled in utilizing UI libraries like Tailwind CSS, Material-UI, and styled-components to create visually appealing web applications and smooth user interactions. Knowledgeable in backend technologies including Node.js and Nest.js. Proficient in backend development with MongoDB, Prisma, and PostgreSQL databases.

### WORK EXPERIENCE

#### Senior Front-end Developer

Kifiya Financial Technology

Since August 2023

- working on developing the front-end of a B2B e-commerce web application. The application has already welcomed 500 retailers and merchants and has been built using Next.js, Redux, and TailwindCSS.
- I am continuously maintaining and enhancing the application based on new requirements.

#### Senior Front-end Developer

Kepler Lab Co. Ltd

Since July 2023

- Led front-end development for an AI product using Next.js, React Query, AWS, and Docker.
- Developed sound processing web application using Open AI API and integrated it with another AI model for text processing and sound generation.

#### Lead Front-end Developer

JaktTech Engineering

September 2022 - November 2023

- Worked on the development of enterprise web applications for major banks and insurance companies
- Automated manual processes and enhancing operational efficiency. Spearheaded the creation of a comprehensive SMS gateway management system, featuring a web application, client dashboard, and multi-role management interface.
- Developed an automated garage system for a leading car repair and shopping company, streamlining the car repair process from entry to bill management, human resource allocation, and invoicing.

#### Front-end Developer

2F-Capital

March 2021 - September 2022

- I have developed a taxi-hailing app that manages users, drivers, transactions, and accounts. It includes street pickup management integrated with Google Maps, report management, and journey tracking, reimbursement features for transaction issues and manages registered company profiles.
- I built the Sewasew ( an Ethiopian music streaming platform connecting fans with artists) and CNCM (the web application and dashboard for an Ethiopian copyright society)

#### Full Stack Developer

UpScale

March 2019 - January 2021

- Developed LMS for a local high school as a backend developer.
- Developed the landing page and admin management for **Adama FC as FullStack**
